

i hope that nothing ever happens to xm radio. It is the best thing that ever happened to the american trucker. Probably shouldnt have said that because they will probably do away with it now. I spend about 12 hours a day five days a week in my truck and all i have to do is punch a button and listen to anything I want to. I have a unit in my semi, car and p/up. I hope that i never have to be without it. I also have a boom box that when I go out fishing I can listen to news and weather. Do not destroy the best thing that ever happened to radio.
